**Amendments****In the Specification**

Please amend the title to "Method For Configuring An Electrical Connector With Flattened Corner". It is believed that the title is more descriptive so as to demonstrate the features and spirit of the invention. If Examiner has a better idea, applicant welcomes any suggestion.

**In the Abstract of the Invention**

Please kindly replace the original Abstract with the following.

"A method is provided for configuring an electrical connector with keying device. The method includes the steps of providing a pair of stacked silos. Providing at least one flattened corner to at least one of the lower corners thereby configuring a certain number of units. In one of the embodiments, there are a total of eight different units that are configured. Then configuring the electrical connector is performed by selecting stacked silos from the units."

**In the Claims**

No amendments made to existing claims.
